# Cleaning records
## ... easily and silently as never before!
Nessie
VINYLMASTER
## Clean your records perfectly in 3 steps

### 1 AUTOMATIC CLEANER DOSAGE

Fill your record cleaner into the internal tank.

Start the cleaning programme by simply pressing a button!

A dosing pump distributes the cleaning agent over the record surface: precisely in the right amount.
### 2 AUTOMATIC CLEANING

# Clean vinyl records sound better!

The grooves of audio records are often contaminated with grease, dust, nicotine, skin particles, paper fibres and other matter. Sometimes, even new records are soiled with deposits from production. These records often produce disturbing noise and have a low sound quality when being played.

The contaminations are deep down in the grooves and cannot be removed simply with a brush or cloth. Only wet cleaning ensures thorough removal of contamination. Therefore, a good record-cleaning machine is a must-have for every lover of vinyl records.
Grooves *before* cleaning      Grooves *after* cleaning

## 3  GENTLE DRYING

The record is cleaned with the help of a twin brush. The brush adjusts automatically to any irregularities in the record surface.

The entire record width (100 mm) is cleaned. Nowhere near all machines do this!

The turntable changes its direction at regular intervals.

A timer signals acoustically when the record is clean! The cleaning cycle takes approximately two minutes per record face.

Loosened contamination is extracted. The extraction system treats your records with utmost care and emits very low noise.

After the extraction cycle, the record is completely clean and dry. Nessie Vinyl-master® dispenses with electrostatic charging. You can immediately play your record.

*Extremely silent extraction!*

## Technical Data

| | |
|---|---|
| Dimensions (L x W x D): | 400 x 330 x 170 mm |
| Weight: | 9 kg |
| Supply voltage: | 230 V/50 Hz, 100 V 50/60 Hz |
| Power consumption in cleaning mode: | 8 Watt |
| Power consumption in extraction mode: | 255 Watt |
| Protection: | 2, IP22 |
| Declaration of Conformity: | CE |
| Tank capacity, cleaning agent: | 650 ml |
| Tank capacity, wastewater: | 800 ml |
| Weighted sound pressure level: | only 48 db (A) at a distance of one metre |

## *NEW!*
## Intensive cleaning programme

Sometimes, it may be necessary to clean a record very profoundly. The intensive cleaning programme of Nessie Vinylmaster® provides an extra long cleaning cycle for this task. During the intensive cycle, liquid is automatically reapplied as required. This ensures that even severely contaminated records become clean down to the grooves again.

Press the start button for three seconds to activate the intensive cleaning programme.

### Nessie Vinylin® record cleaner
Powerful against dirt - gentle to your records
